

# Contents

<i>Preface</i>	<i>xi</i>
<b>1. Emerging Technologies for Abiotic Stress Management in Crop Plants</b>	<b>1</b>
<i>Gurumurthy S, Karam Husain, Rudresh K, Amar, Yashwanth RD, Vaibhav Kumar, Kalpana Tiwari, Meena SK, and Soren KR</i>	
<b>2. Recent Advances in Phenotyping for Abiotic Stress Tolerance</b>	<b>14</b>
<i>Gurumurthy S, Bandeppa, GS, Senjam Jinus S, Tiwari, TN, Patel, DP, Helena, D. Shephrou, Nemneineng Haokip, Thalhun Lhingkhanthem Kipgen and Vandana Mutum</i>	
<b>3. Instrumentation Techniques for Assessing Stress Tolerance in Crops</b>	<b>31</b>
<i>Gurumurthy S, Vijay Laxmi, Basu PS, Gopala, Nitesh SD, Prakash HG, Nath CP, Basavaraja, T and Soren KR</i>	
<b>4. Salinity: Distribution and Impacts on Plants</b>	<b>41</b>
<i>Mamta, A Kumar, N Kumar, S Kumar, Monika, Heena and S S Arya</i>	
<b>5. Generation and Scavenging Mechanism of ROS in Plants</b>	<b>75</b>
<i>Shashi Meena and Sheel Yadav</i>	
<b>6. Transcription Factors: A Molecular Key to Engineer Drought Stress Tolerance in Crop Plants</b>	<b>103</b>
<i>Prafull Salvi, Mrinalini Manna, Tanika Thakur</i>	
<b>7. Temperature Extremes in Sugarcane- An Overview</b>	<b>127</b>
<i>Arun Kumar. R, Vasantha. S, Pooja. D, C.Appunu and V. Krishnapriya</i>	
<b>8. Morpho-Physiological Traits having Influence on Development of ‘Dual Nutrient’ Stress Tolerant Crop Variety</b>	<b>139</b>
<i>Priya Paul</i>	
<b>9. Waterlogging Stress in Plants and Tolerant Approaches</b>	<b>145</b>
<i>Basant Kumar Dadrwal, Uday Pratap Singh, Jyoti Chauhan, Bhudev RY, Vijai P.</i>	

**10. Physiological Impacts of High Temperature Stress in Plants 163**

*Gurumurthy S, Bandeppa GS, Tiwari TN, Gopala, Patel DP and Basu PS*

**11. Nitrogen and Phosphorous Deficiency Tolerance in Plants Regulated by Growth Hormones 172**

*Priya Paul*
