#	Title of Experiments	Page
	Pharmaceutical Inorganic Chemistry - (BP110P)	
1	To perform limit test of chloride for given sample as per I.P	3
2	To perform modified limit test of chloride	5
a	Modified limit test for coloured impurity	3
b	Modified limit test for magnesium trisilicate impurity	7
3	To perform limit test of Sulphate for given sample as per I.P	9
4	To perform modified limit test of sulphate for coloured sample	11
5	To perform limit test of Iron for given sample as per I.P.	13
6	To perform limit test of heavy metals (lead) for given sample as per I.P	15
7	To perform limit test of Arsenic for given sample as per I.P	19
8	To prepare boric acid	22
9	To prepare potash alum	23
10	To prepare ferrous sulphate	25
11	To perform the identification test for ferrous sulphate	27
12	To perform the identification test for sodium bicarbonate	29
13	To perform the identification test for copper sulphate	31
14	To perform the identification test for magnesium hydroxide	33
15	To determine swelling power of Bentonite	35
16	To estimate neutralizing capacity of aluminium hydroxide gel I.P	36
17	To determine Potassium iodate and iodine in Potassium Iodide	38
	Pharmaceutical Organic Chemistry – I	
	Qualitative Analysis of Unknown Compound	43
	Organic compounds – Solubility and Regeneration	43
	Reaction of Acid and Base	45
	Reaction of Phenol and Separation Scheme	46
i	Physical Characteristics	47
ii	Dry Heating Test	48
iii	Unsaturation Test:	48

iv	Solubility Test:	50
v	Action of FeCl ₃ Solution	51
vi	Element Detection Test (Lassaigne's Test)	52
vii	Detection of Functional Group or Groups Present	55
	A. Test for Compounds Containing C, H and Possibly Oxygen:	58
	Carboxylic acid	58
	Phenols	59
	Neutral Compounds: Alcohols, Aldehydes, Ketones, Esters, Ethers, Carbohydrates, Acid anhydrides, Quinones, Hydrocarbons	59
	B. Test for compounds containing C, H, O, and N:	65
	Acids: Amino Acids, Nitro Acids	66
	Phenols: Nitro phenols	67
	Basic: Amines	67
	Neutral Compounds: Amides, Imides, Nitriles, Anilides, Nitro hydrocarbons, Thiols/Mercaptans	70
	C. Test for compounds containing C, H, O, and Halogens	72
	Acids: Halo Acids	72
	Halo Hydrocarbons, Haloaldehydes, Halo Ketones	73
	D. Test for compounds containing C, H, O, N and Sulphur	73
	Acids: Sulphonic Acids	73
	Neutral Compounds: Thiourea, Sulphonamides, Thiols/Mercaptans	73
	Derivatives Preparation	74
1	To prepare benzoyl/benzoate derivative of Aniline (Benzanilide from Aniline)	77
2	To prepare benzoyl/benzoate derivative of Phenol (Phenyl Benzoate from Phenol)	79
3	To prepare nitro derivative of acetanilide (p-nitroacetanilide from acetanilide)	81
4	To prepare 2,4-dinitrophenylhydrazine derivative of benzaldehyde (Benzaldehyde-2,4-dinitrophenylhydrazone from Benzaldehyde)	83
	Pharmaceutical Organic Chemistry- II (BP305P)	
1	Experiments involving laboratory techniques	87
1A	Recrystallization	87

1B	Steam distillation	94
2	Preparation of Compounds	95
1	To synthesize Benzanilide from Aniline by acylation reaction	95
2	To synthesize Phenyl Benzoate from Phenol by acylation reaction	98
3	To synthesize P-Bromoacetanilide from Acetanilide by halogenation (Bromination) reaction	101
4	Recrystallization of Benzanilide or Phenyl Benzoate or P-Bromoacetanilide	104
5	To synthesize m-Dinitrobenzene from Nitrobenzene by nitration reaction	107
6	To Synthesize 5-Nitrosalicylic acid from salicylic acid by nitration reaction	110
7	To synthesize Benzoic acid from Benzyl chloride by oxidation reaction	113
8	To synthesize Benzoic acid from ethyl benzoate by hydrolysis reaction	116
9	Recrystallization of Benzoic Acid	118
10	To synthesize salicylic acid from ethyl salicylate by hydrolysis reaction	121
11	To synthesize 1-Phenyl azo-2-naphthol from Aniline by diazotization and coupling reactions	123
12	To synthesize Benzil from Benzoin by oxidation reaction	126
13	To Synthesize Dibenzal acetone from Benzaldehyde by Claisen Schmidt reaction	129
14	To Synthesize Cinnamic acid from Benzaldehyde by Perkin reaction	132
3	Determination of following oil values	135
15	To Determine saponification value of given sample of oil	135
16	To Determine Acid value of given sample of oil	137
17	To Determine Iodine value of given sample of oil	139
	Medicinal Chemistry- I (BP406P)	
1	1,3 pyrazole	143
2	1,3 oxazole	146
3	To synthesize Benzimidazole from o-phenylenediamine	149
4	To synthesize Benzotriazole from o-phenylenediamine	152
5	To synthesize 2,3- diphenyl quinoxaline from o-phenylenediamine	155
6	Recrystallization of Benzimidazole, Benzotriazole and 2,3- diphenyl quinoxaline	158

7	To synthesize Phenytoin from benzil	161
8	To synthesize Benzocaine from P-amino benzoic acid (PABA)	164
9	To synthesize phenothiazine.	167
10	To synthesize barbituric acid from urea and ethyl malonate	169
11	To perform the assay of aspirin tablet	171
12	To perform the assay of Ibuprofen tablet	174
13	To perform the assay of Furosemide tablet	177
14	To perform the assay of Atropine	179
15	To perform the assay of Phenobarbitone	182
16	To perform the assay of Chlorpromazine.	184
17	To determine the partition coefficient of salicylic acid between n-Octanol and Water	186
18	To determine the partition coefficient of Mefenamic Acid tablet between n-Octanol and Water	188
	Medicinal Chemistry- III (BP607P)	
1	To perform the synthesis of Sulphanilamide	193
2	To perform the synthesis of 7-Hydroxy, 4-methyl coumarin.	197
3	To perform the synthesis of Chlorobutanol	200
4	To perform the synthesis of Triphenyl imidazole	202
5	To perform the synthesis of Tolbutamide	205
6	To perform the synthesis of Hexamine	210
7	To perform the assay of Isonicotinic acid hydrazide	213
8	To perform the assay of Chloroquine	215
9	To perform the assay of Metronidazole	218
10	To perform the assay of Dapsone	220
11	To perform the assay of Chlorpheniramine maleate	222
12	To perform synthesis of Quinazoline derivative via Microwave Irradiation.	224
13	To perform synthesis of aryl chalcone from substituted aldehyde and substituted acetophenone via Microwave Irradiation.	227
14	To perform hydrolysis of benzamide via Microwave Irradiation.	230
	Melting Point of Organic Compounds	233
	Index	246
