| Uı | nit- I: Introduction |
| Ch | apter 1: Introduction to Minimally Invasive Dentistry |
| • | Definition |
| • | Background |
| • | Concept of MID |
| • | Principles of MID |
| • | Rationale of MID philosophy |
| • | Goals of MID |
| Ch | apter 2: Introduction to Minimally Invasive Paediatric Dentistry |
| • | The Paediatric Patient |
| • | Focus of the First Dental Visit |
| • | Strategies for Maintaining Caries-Free Primary Teeth |
| Uı | nit- II: Dental Caries Management with MID |
| Ch | apter 3: Caries Risk Assessment in Children |
| • | History of CAMBRA |
| • | CAMBRA Principle |
| • | Caries Imbalance Concept |
| • | Caries Risk Assessment Tool (CAT) |
| Ch | apter 4: Remineralization of Early Lesions |
| • | Remineralization |
| • | Classification of Remineralizing Agents |
| • | Non-Fluoridated Remineralizing Agents |
| | |

| Cha | apter 5: Silver Diamine Fluoride |
|-----|---|
| • | History of SDF |
| • | Clinical Applications of SDF |
| • | Studies on SDF |
| • | Effects of SDF on Various Tooth Structures |
| • | Zombie Effect |
| Ur | nit- III: Minimally Invasive Operative Interventions |
| Cha | apter 6: Preventive Resin Restoration |
| • | Definition |
| • | Types of PRR |
| • | Technique for PRR |
| • | Success Rate |
| • | Applications in Children |
| Cha | apter 7: Hall Technique77 |
| • | Preformed Metal Crowns |
| • | Rationale for Sealing Caries |
| • | Hall Technique |
| • | Potential Complications |
| • | Success and Failure Criteria of Conventional Restorations and the Hall |
| | Technique crowns |
| • | Recent Studies |
| Cha | apter 8: Modified Cavity Preparation Designs and Techniques in Paediatric |
| | Dentistry93 |
| • | Classification System |
| • | Principles of Cavity Design |
| • | Cavity Preparation Designs for Approximal Lesions |
| • | Sandwich Technique |
| • | Modalities of Caries Excavation |
| | |

| Ch | apter 9: Atraumatic Restorative Treatment (ART) |
|----|---|
| • | Definition and ART Concept |
| • | History |
| • | Rationale of ART |
| • | Technique of ART |
| • | ART in Disabled Patients |
| • | Criteria to Evaluate ART Restorations |
| • | Interim Therapeutic Restorations (ITR) |
| • | ART v/s ITR |
| • | SMART – Definition, Technique and Clinical Studies |
| Ur | nit- IV: Newer Caries Preventive Methods |
| Ch | apter 10: Chemo-Mechanical Caries Removal |
| • | History |
| • | Various Chemical Agents used in Chemo-Mechanical Caries Removal |
| Ur | nit- V: Minimally Invasive Non-Operative Interventions |
| Ch | apter 11: Pit and Fissure Sealants |
| • | Definitions |
| • | Historical Milestones |
| • | Morphology of Pits and Fissures |
| • | Classification of Sealant Materials |
| • | AAPD Guidelines for Placement of Pit and Fissure Sealants in Children |
| • | Clinical Technique for Placement of Pit and Fissure Sealants |
| • | Assessment Criteria of Sealants |
| | |
| • | Recent Advances in Pit and Fissure Sealants |
| | Recent Advances in Pit and Fissure Sealants apter 12: Ozone Therapy in Dentistry |
| | |
| | apter 12: Ozone Therapy in Dentistry |

| • | Ozone Generating Systems and Other Applications |
|----|--|
| • | Ozone Toxicity |
| Ch | napter 13: Lasers in Paediatric Dentistry |
| • | Introduction and Theory of Laser |
| • | Principle of Laser Radiation |
| • | Classification of Lasers |
| • | Application of Laser in Paediatric Dentistry |
| • | Characteristics of Dental Lasers |
| • | Laser Hazards |
| Ch | napter 14: Resin Infiltration |
| • | Resin Infiltration Concept |
| • | Resin Infiltration Kit |
| • | Clinical Applications |
| • | Resin Infiltration in Primary Teeth |
| • | Research Studies on Resin Infiltration |
| Ch | napter 15: Etch-Bleach-Seal |
| • | The Etch-Bleach-Seal Technique – Clinical Procedure, Advantages, |
| | Disadvantages |
| Ch | apter 16: Smart Materials |
| • | Definition |
| • | Smart Materials in Dentistry |
