Contents

Preface ..... *ix*

Acknowledgement ..... *xi*

List of Abbreviations ..... *xiii*

Unit 1

Introduction to Python Programming 1

1.1 What is Python? 1

1.2 Installing Python 2

1.3 Integrated Development Environments (IDEs) 3

1.4 Python Variables and Data Types 6

1.5 Type Casting 7

1.6 Operators in Python 8

1.7 Input and Output Operations 11

1.8 String Operations and Manipulation 13

1.9 Python Libraries 15

1.10 Practical Programs — Unit 1 17

1.12 Practice Questions 22

Unit 2

Control Structures and Functions 24

2.1 Conditional Statements 24

2.2 Loops 27

2.3 Functions 30

2.4 Pharmaceutical Applications 32

2.5 Practice Questions — Unit 2 36

Unit 3

Data Structures and File Handling 38

3.1 Lists 38

3.2 Tuples 39

3.3 Dictionaries 40
3.4 NumPy — Numerical Computing 41
3.5 File Handling — CSV Files 44
3.6 Practice Questions — Unit 3 46

Unit 4

Data Handling with Pandas 48
4.1 Introduction to Pandas 48
4.2 The Pandas Series 48
4.3 The Pandas DataFrame 49
4.4 Reading Files into a DataFrame 50
4.5 Inspection Functions 51
4.6 Data Cleaning 52
4.7 Filtering and Selecting Data 53
4.8 Grouping and Aggregation 55
4.9 Practice Questions — Unit 4 57

Unit 5

Data Visualisation with Matplotlib 59
5.1 Introduction to Matplotlib 59
5.2 Line Plots — Concentration-Time Profiles 60
5.3 Histograms — Visualising Distributions 62
5.4 Scatter Plots — Exploring Relationships 64
5.5 Box Plots — Comparing Group Distributions 67
5.6 Pharmaceutical Visualisation Projects 69
5.7 Scientific Interpretation of Graphs 76
5.8 Practice Questions — Unit 5 77
