<i>Preface</i>	v
<i>Syllabus</i>	vii

Chapter 1

Laboratory Animals and Bioassays	1
1.1 Importance of Laboratory Animals	1
1.2 Transgenic Animals	5
1.3 Anaesthesia and Euthanasia of Experimental Animals	9
1.4 Euthanasia in Laboratory Animals	10
1.5 Maintenance and Breeding of Laboratory Animals	12
1.6 CCSEA Guidelines to Conduct Experiments On Animals	15
1.7 Good Laboratory Practices (GLP) in Animal Studies	18
1.8 Bioassay	20
1.9 Dose Selection, Calculation, Conversions and Preparation of Drug Solutions (As Per OECD Guidelines)	26
1.10 Important Questions (Theory and Viva)	28

Chapter 2

Pre-clinical Screening of New Substances	31
2.1 General Principles of Pre-clinical Screening	31
2.2 Types of Pharmacological Screening Methods	31
2.3 Types of Screening Models	31
2.4 Introduction to CNS Pharmacology	34
2.5 Behavioural Studies and Muscle Coordination Tests	34
2.6 CNS Stimulants and Depressants	40
2.7 Anxiolytics	47
2.8 Anti-Depressants	49
2.9 Anti-Psychotics	61
2.10 Anti-epileptics	68
2.11 Nootropics	76
2.12 Anti-Alzheimer's	86

2.13 Anti-Parkinson's.....	90
2.14 Multiple Sclerosis	106
2.15 Analgesics	118
2.16 Anti-Pyretics	133
2.17 Anti-inflammatory.....	135
2.18 Important Questions.....	140

Chapter 3

Screening Methods for Autonomic Nervous System 144

3.1. Screening Methods for Sympathomimetic Drugs (Adrenergic Agonists)	144
3.2. Screening of Sympatholytic Drugs (Adrenergic Antagonists).....	149
3.3 Screening Methods for Parasympathomimetic Drugs (Cholinomimetic or Cholinergic Agonists)	155
3.4 Screening Methods for Parasympatholytic Drugs	160
3.5 Screening Methods for Drugs Acting on Eyes.....	164
3.6 Important Questions.....	167

Chapter 4

Respiratory Pharmacology 169

4.1 Screening Methods for Anti-Asthmatic Drugs	169
4.2 Screening Methods for Drugs Used in COPD	174
4.3 Screening Methods for Anti-Allergic Drugs.....	176
4.4 Important Questions.....	179

Chapter 5

Reproductive Pharmacology 182

5.1 Drugs with Aphrodisiac Activity	182
5.2 Drugs with Anti-fertility Activity.....	184
5.3 Important Questions.....	186

Chapter 6

Gastrointestinal Drugs 188

6.1 Drugs with Anti-Ulcer Activity.....	188
6.2 Anti-Emetic Drugs	194
6.3 Anti-Diarrhoeal Drugs	196
6.4 Laxatives (Purgative Drugs)	199
6.5 Important Questions.....	201

Chapter 7

Cardiovascular Pharmacology	203
7.1 Anti-hypertensives	203
7.2 Anti-arrhythmics	210
7.3 Anti-anginal Agents	215
7.4 Anti-atherosclerotic Agents.....	221
7.5 Diuretics.....	227
7.6 Important Questions.....	231

Chapter 8

Metabolic Disorders	233
8.1 Screening Methods for Anti-diabetic Agents.....	233
8.2 Screening Methods for Anti-dyslipidemic Agents.....	240
8.3 Important Questions.....	246

Chapter 9

Anti-cancer Agents.....	248
9.1 Classification of Screening Models for Anti-cancer Agents.....	248
9.2 Important Questions.....	254

Chapter 10

Hepatoprotective Screening Methods.....	256
10.1 Introduction.....	256
10.2 In Vivo Experimental Models	256
10.3 In Vitro Experimental Models.....	259
10.4 Important Questions.....	262

Chapter 11

Immunomodulators.....	264
11.1 Introduction.....	264
11.2 Classification of Experimental Models	264
11.3 In Vivo Models.....	264
11.4 In Vitro Models	268
11.5 General Principles of Immunoassay	269
11.6 Clinical and Research Applications	274
11.7 Immunoassay Methods Evaluation	274
11.8 Immunoassay for Digoxin.....	274

11.9 Immunoassay for Insulin.....	276
11.10 Limitations of Animal Experimentation and Alternate Animal Experiments	277
11.11 Extrapolation of In Vitro Data to Pre-clinical and Pre-clinical to Humans.....	279
11.12 Important Questions.....	284
<i>Sample Question Paper 1.....</i>	<i>287</i>
<i>Sample Question Paper 2.....</i>	<i>289</i>
<i>Sample Question Paper 3.....</i>	<i>291</i>
<i>Model End Term Examination-I.....</i>	<i>293</i>
<i>Model End Term Examination-II</i>	<i>294</i>
