

Contents

<i>Preface</i>	<i>xi</i>
Chapter 1	
Introduction	1
Chapter 2	
Classification of Stem Cells.....	9
Chapter 3	
Scaffolds in Tissue Engineering.....	22
Chapter 4	
Harvesting Stem Cells	70
Chapter 5	
Culturing Stem Cells	90
Chapter 6	
Induced Pluripotent Stem Cells and their Applications.....	109
Chapter 7	
Clinical Applications of Dental Stem Cells in the Oral and Maxillofacial Region.....	119
Chapter 8	
Clinical Applications of Stem Cells in Systemic Diseases.....	138
Chapter 9	
Stem Cells Therapy for Infections.....	152
Chapter 10	
Applications of Platelet-Rich Plasma (PRP) and Platelet-Rich Fibrin (PRF) and concentrated growth factor(CGF) in Oral and Maxillofacial Region.....	159
Chapter 11	
Regenerative Endodontics	169
Chapter 12	
Cancer Stem Cells.....	178

Chapter 13

Immunotherapy in Oral Cancer	207
------------------------------------	-----

Chapter 14

Exosomes in Oral and Maxillofacial Region.....	216
--	-----

Chapter 15

Integrating Microfluidics, Biomaterials, and Cellular Systems in Organ-on-a-Chip Design	226
--	-----

Chapter 16

Gene Therapy in Oral Cancer	237
-----------------------------------	-----

Chapter 17

Application of Biomaterials and Tissue Engineering in Regenerative Medicine	244
---	-----

Chapter 18

Ethical Considerations in Regenerative Medicine.....	256
--	-----

Chapter 19

3D Bioprinting for Facial Regeneration: From Imaging to Implant.....	261
--	-----

Chapter 20

Pulp Therapy in Children: A Biological, Tooth-Preserving Approach	282
---	-----

Chapter 21

Next Generation Regenerative Medicine: Convergence of Nanotechnology and Stem Cell Therapy	293
---	-----

Chapter 22

Translational Engineering in Regenerative Medicine	314
--	-----

Chapter 23

Distraction Osteogenesis of Craniomaxillofacial Skeleton- A Regenerative Technique	340
---	-----
