(FORENSIC MEDICINE)

General and Fundamentals

1. Introduction- Forensic Medicine and Toxicology 1
2. Legal Procedures 4

Medical Law and Ethics

3. Medical Law and Ethics 14

Modern/Advanced Technologies in Forensics

4. Molecular Anatomy, Virtual Autopsy and Digital Morphometrics 32

Thanatology and Autopsy

5. Death and Changes After Death 43
6. Clinical Post-Mortem Dissection and Post-Interment Tissue Examination 48
7. Sudden Death 57
8. Postmortem Artefacts 65

Traumatology

9. Forensic Anatomy/Identification 74
10. Mechanical Injuries 86
11. Gunshot Wounds and Explosion Injuries 98
12. Regional Injuries 110
13. Transportation Injuries 115
14. Thermal Injuries 126
15. Electrical Injuries, Lightning and Radiation 136
16. Medicolegal Aspects of Injuries 146
17. Asphyxial Death 148
18. Clinical Anatomy of Pelvic Trauma and Perineal Injuries 171

Clinical Forensic Medicine

19. Starvation 187

20. Anaesthetic Deaths 193
21. Impotence and Sterility 200
22. Pelvic Architecture and Gestational Morphological Markers 207
23. Medical Termination of Pregnancy and Abortion 215
24. Infanticide 221
25. Forensic Psychiatry 227

Forensics and Crime Scene Investigation

26. Examination of Stains and Scene of Crime 240

(TOXICOLOGY)

General Toxicology

27. General Considerations of Toxicology 246

Inorganic Poisons

28. Corrosive Poisons 257
29. Metallic Poisons 263
30. Non-Metallic Irritants 270

Organic and Agricultural Poisons

31. Toxic Plants (Organic Irritants) 275
32. Agricultural Poisons 280
33. Animal Irritants 294

Neurotoxic and Systemic Poisons

34. Alcohols 310
35. Cardiac Poisons 318
36. Deliriants 327
37. Somniferous Drugs 336
38. Drug Dependence 343
39. Medicinal Poisons 349
40. Spinal Poisons 353

Environmental and Miscellaneous Poisons

41. Irrespirable Gases 359
42. Food Poisoning 365
