Preface ..... *vii*

Acknowledgement ..... *ix*

Biochemistry: An Introduction 1

1. To perform the identification test for proteins (Albumin or Casein). 6
2. To perform Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Sucrose and starch). 14
3. To perform the Qualitative analysis of urine for normal and abnormal constituents 34
4. To determine the blood sugar 41
5. To perform the test for determination of serum total cholesterol 46
6. To perform the Estimation of urea, creatinine, and uric acid in serum 48
7. To perform the Estimation of serum total protein and albumin 53
8. To study the Enzymatic hydrolysis of starch. 56
9. To study the effect of temperature on salivary amylase activity. 57
10. To study the effect of substrate concentration on salivary amylase activity. 59
11. Estimation of haemoglobin in blood by Sahli's method / Cyanmethemoglobin method. 61
12. Estimation of serum bilirubin (total and direct bilirubin). 64
13. Estimation of glycogen content 66
14. To estimate the activity of Serum Glutamate Oxaloacetate Transaminase (SGOT/AST) and Serum Glutamate Pyruvate Transaminase (SGPT/ALT) in serum by the IFCC kinetic UV method. 69
