

# Applied Microbiology

---

## Contents

<i>Preface</i> .....	v
<i>Acknowledgement</i> .....	vii
<b>Unit 1: Introduction and History of Microbiology</b>	
1. The Scope of Microbiology .....	3
2. History of Microbiology .....	13
3. Evolution of Microbial Life.....	25
4. Microbial Taxonomy and Diversity .....	29
<b>Unit 2: Isolation, Identification and Preservation of Microorganisms</b>	
1. Culture and Culture Media .....	55
2. Isolation of Microorganisms .....	58
3. Identification of Microorganisms.....	60
4. Preservation of Microorganisms .....	81
<b>Unit 3: Physiology of Bacteria</b>	
1. The Morphology of Bacteria .....	87
2. Ultrastructure of Bacteria .....	91
3. Bacterial Growth, Kinetics, and Measurement.....	103
4. Measurement of Microbial Growth .....	108
5. Effect of Environment of Bacterial Growth.....	111
6. Synchronous Culture, Continuous Culture and Bacterial Biofilm.....	115
7. Microbial Metabolism .....	119
8. Microbial Photosynthesis.....	133
<b>Unit 4: Control of Micro-Organisms</b>	
1. Fundamentals of Control .....	139
2. Classification of Materials to be Sterilised/Disinfected.....	140
3. Factors Affecting on the Efficiency of an Antimicrobial Agent.....	141
4. Physical Methods for Microbial Control .....	142
5. Chemical Agents for Microbial Control .....	147
6. Antibiotics for Microbial Control.....	151
7. Testing of Disinfectants .....	165
8. Sterility Indicators .....	167

**Unit 5: Microbial Genetics**

1. Basics of Genetics.....	171
2. Gene Structure and Function .....	172
3. Organization of Chromosomes in Prokaryotes.....	174
4. Difference Between Prokaryotic and Eukaryotic Chromosome Organization .....	179
5. DNA Structure and Functions.....	186
6. RNA Structure and Function .....	189
7. Plasmids, Types, and their Functions.....	192
8. Mutations and their Types.....	195
9. DNA Repair .....	200
10. Bacterial Genetic System.....	202
11. Genetic Code Properties and Function .....	209
12. Ames Test for Carcinogens.....	212
13. Lac Operon Model.....	214

**Unit 6: Virology**

1. Introduction to Virology .....	219
2. Baltimore Classification of Viruses .....	224
3. Replication of Viruses.....	225
4. Cultivation and Isolation of Animal and Plant Viruses.....	229
5. Purification of Animal and Plant Viruses.....	233
6. Viroid's and Prions .....	236

**Unit 7: Immunology**

1. Introduction to Immunology.....	241
2. Types of Immunity.....	244
3. Hematopoiesis, Lymphoid Organs, and Lymphocytes .....	248
4. Antigen, Antibodies and their Reaction Methods.....	260
5. The Complement System and Fixation Test.....	274
6. Vaccine and Their Different Types .....	280
7. Immune Response, Hypersensitivity, Autoimmunity, and Immunodeficiency Diseases.....	283
8. Transplantation, Rejection, and Laws.....	299

---

**Unit 8: Mycology**

1. Introduction to Mycology .....	307
2. Classification of Fungi .....	309
3. Reproduction in Fungi .....	312
4. Pathogenesis of Fungal Infections .....	315
5. Important Fungal Diseases .....	320

**Unit 9: Extremophiles**

1. Thermophiles .....	337
2. Psychrophiles .....	345
3. Halophiles .....	350
4. Alkaliphiles .....	356
5. Acidophiles .....	360
6. Barophiles .....	363
7. Radiophiles .....	366

**Unit 10: Soil Microbiology**

1. Soil Properties and Microorganisms .....	371
2. Bioremediations and Organic Matter .....	377
3. Biogeochemical Cycles .....	381
4. Role of Bio-fertilizers in Agriculture and Forestry .....	388
5. Phytoremediation .....	397
6. Biodeterioration .....	399
7. Microbial Biomass and Biofuel Energy .....	401

**Unit 11: Air Microbiology**

1. Introduction to Air Microbiology .....	409
2. Microbial Air Pollution .....	411
3. Infectious Airborne Diseases .....	416
4. Air Quality Analysis .....	418

**Unit 12: Milk Microbiology**

1. Introduction .....	425
2. Milk Composition .....	426
3. Milk Hygiene .....	427

4. Significance of Microorganisms in Milk .....	428
5. Spreading of Diseases Via Milk.....	429
6. Sources of Contamination in Milk.....	431
7. Microbial Products of Milk .....	434
8. Food Infection, Intoxication, and Toxic Infection .....	439
9. Milk Borne Diseases.....	445
10. Qualitative and Quantitative Methods of Milk Testing .....	450

**Unit 13: Food Microbiology**

1. Food as a Substrate for Microorganisms .....	457
2. Microorganisms Important in Food Microbiology .....	460
3. Fermented Foods and their Importance .....	464
4. Microbial Food Spoilage and Poisoning.....	472
5. Food Poisoning and Food Borne Parasites .....	486
6. Mycotoxins, Types and Control.....	491
7. Food Preservation .....	494
8. Food Quality and Assessment.....	501
9. Enumeration of Spoilage of Microorganisms .....	504
10. Detection of Pathogens in Food.....	505

**Unit 14: Industrial Microbiology**

1. Introduction to Industrial Microbiology .....	509
2. Screening and Strain Development .....	513
3. Fermentation and Downstream Processing .....	518
4. Fermentation Media.....	528
5. Downstream Processing.....	531
6. Amino Acids and Enzymes.....	542
7. Enzyme Immobilization.....	553
8. Microbial Production of Industrial Products .....	559
9. Bioreactors, Kinetics and their Sterilization.....	571

**Unit 15: Water Microbiology**

1. Introduction.....	589
2. The Vocabulary of Water Microbiology .....	591

---

3. Types of Water .....	592
4. Microbial Components of Water.....	593
5. Water Pollution .....	594
6. Indicator Organisms.....	595
7. Diseases Transmitted by Water .....	596
8. Water Treatment.....	597
<b>Unit 16: Pharmaceutical Microbiology</b>	
1. Introduction.....	607
2. Pharmaceutical Industry History and Development .....	610
3. Types of Water Used in the Pharma Industry .....	614
4. Microbiological Spoilage and Preservation of Pharmaceutical Products.....	617
5. Chemotherapeutic Agents and their Mechanism of Action .....	625
6. Antibiotic Resistance and Development of New Therapeutics .....	639
7. Gene Therapy.....	645
8. Laboratory Assays for Pharmaceutical Products .....	653
9. Vaccine and their Different Types.....	661
10. Bacterial Endotoxin Test (BET) .....	665
11. Environmental Monitoring .....	670
<i>Frequently Asked Questions</i> .....	673
<i>References</i> .....	674
